SLF Hanks (Fibres) 3.85			

SLF Standard Dubbing - can be used, as an alternative to seal's fur for any flies of all sizes from size 2 to bout size 18. It is better than seal's fur because it handles well and the colours are strictly controlled and are consistent.

SLF Hanks (Fibres) - can be used for wings of salmon, sea trout and steelhead. It can be "laminated" to build up bodies for fly patterns. It is also very popular for winging on salt-water flies. The fibres are about 2 1/2" long.
