VINYL LURE AND JIG FINISH

[Index](#)

The toughest finish ever put on a lure. The vinyl characteristics of this paint makes it extremely effective against chipping. Lures can be dipped or sprayed. Spraying may require multiple coats.

For best results on fluorescent colours use the white undercoat. (The white may also be used as a finish coat.)

To obtain a HIGH GLOSS apply CLEAR as a finish coating.

Glow is highly PHOSPHORESCENT and will glow up to 16 hours. (For best results use two coats over white undercoat.) Glows a bright luminescent Green.

Vinyl Finish colours have a shelf life of 1 to 3 years.

POWDER PAINT

[Index](#)

Easy to use! Just heat your lure over a smokeless candle flame or in a toaster oven and dip into powder paint. Remove and watch the paint melt onto the lure. It's simple! For maximum durability hang it back in the oven for another 10 to 15 minutes. No primer, no base coat, one coat complete coverage! HIGH GLOSS FINISH ONE COAT.

NO FUMES. NO MESSY CLEAN UP. NO DRYING TIME

NON-FLAMMABLE. ONE COAT COVERAGE

USE ON: Jigs. Spinnerbaits. Blades. Spoons

Three steps to painting your lures with powder paint.

1. Hold your jig/blade about 1" above a candle or flame for approximately 5 seconds for each 1/8 oz. Weight
2. Dip into powder paint and remove while knocking off excess paint.
3. Clean hook eye while jig is still warm. (Optional) Cure in oven for 10-15 minutes at 350 degrees F or 180 degrees C to make paint super tough and chip resistant.

Tip: Partially fill a head cement applicator or drinking straw with powder paint and use it to two tone and texture your lure.

Please allow 2 to 3 weeks for delivery
