Red/Red/Brown - [Fly 011](#)

Hook sizing refers to the gape of the hook

Hooks can be shorter in shank length or longer in shank length but with the same gape.

Most flies are tied on a hook size with standard shank length. However, some anglers like Buck Bugs tied on a hook 3X shank length. Thus, a Buck Bug tied on a Size 6 hook 3X would have the size 6 gape but a shank length equivalent to a standard hook 3 ($6 - 3 = 3$).

When ordering Buck Bugs specify hook size and shank length.

The images are of flies tied on hooks of standard shank length.
